

Customers Short on Hydraulic Power? HydraBoost to the rescue!

For over 10 years, Command Hydraulics has been selling the HydraBoost to successfully help farmers add hydraulic power to their existing equipment and save them money. The HydraBoost system is a self-contained auxiliary hydraulic unit and comes in a variety of sizes to meet the various hydraulic output needs.

Benefits

- In-stock and ready to ship
- Costs FAR less than a new tractor
- Fits any planter
- Simple to mount
- Assembled & ready to mount
- Virtually runs on its own
- Allows tractor RPMs to vary & still run planter flawlessly
- Accommodates central commodity systems (CCS)

HydraBoost

The HydraBoost hydraulics booster provides auxiliary hydraulic power to effortlessly operate very large hydraulic planters. HydraBoost enables farmers to run their planter with their tractor, old or new.

HydraBoost includes:

- 20- or 25-gallon tank
- Filter & cooler
- Ports for hoses
- Pressure compensating piston pump
- PumpDoctor support bracket
- Hose kit

Help your customers and increase your equipment sales with our HydraBoost!
